## PROFESSIONAL SUMMARY

Flutter mobile developer and creator of Postmarks, a gamified walking app that turns real-world steps into journeys between cities. Built its mobile architecture, Firebase backend, subscriptions, native step-data integrations, and production release pipeline. U.S. citizen based in Argentina; native Japanese speaker fluent in English and Spanish.

## EXPERIENCE

**Independent Mobile App Developer** Jul 2024 - Present

*Mendoza, Argentina*

**Postmarks** | Commercial Flutter app for iOS and Android Feb 2026 - Present

[App Store](#) | [Google Play](#)

- Designed, built, released, and maintain Postmarks for iOS and Android, owning product strategy, UX/UI, implementation, testing, monetization, analytics, releases, and support for paying customers.
- Built the Flutter and Dart app with Firebase, Cloud Functions, RevenueCat, native step-data integrations, and progression systems spanning routes, collectibles, achievements, streaks, and social features.
- Integrated Claude Code into the production workflow to accelerate implementation while retaining ownership of architecture, requirements, debugging, testing, and releases.

**Bonda** | Social activity platform Jul 2025 - Feb 2026

- Built a substantial social-activity prototype with listings, participant joining, user proposals, curated activities, and date-availability voting.
- Community validation supported a Mendoza-focused pivot but exposed adoption barriers, leading to a deliberate decision not to launch publicly.

**Trip Wizard** | Travel-planning marketplace Jul 2024 - Jul 2025

- Shipped a two-sided travel-planning marketplace with planner profiles, trip requests, proposals, matching, local recommendations, and personalized itineraries.
- Reached approximately 250 Google Play downloads.** Hostel interviews and outreach did not validate a scalable acquisition path, informing the decision to discontinue the product.

**Shipping Clerk | Amazon** Nov 2022 - Aug 2023

*Renton, Washington*

- Promoted after approximately three months.** Coordinated thousands of packages against strict outbound truck deadlines.
- Set floor priorities and assigned urgent unloading, sorting, and loading work based on operational needs and individual abilities.
- Positioned trailers, planned loads for capacity, and added or canceled trucks as volume changed while coordinating across a 100+ associate operation.

**Undergraduate Researcher and Research Scientist | University of Washington** 2019 - 2021

*Seattle, Washington*

- Co-led tool building and analysis for a peer-reviewed Ecosphere study evaluating microclimate datasets used in ecological models.
- Built an R Shiny interface that helped researchers compare datasets by spatial and temporal coverage; contributed to the shared open-source TrenchR codebase and co-authored the 2021 Microclimate Data Users' Guide with a cross-disciplinary research team.

## EDUCATION

**University of Washington | Bachelor of Science in Biology** Jun 2020

*Seattle, Washington* | GPA: 3.81 | cum laude

## SKILLS

**Core development:** Flutter, Dart, Firebase Authentication, Firestore, Cloud Functions, security rules and indexes, Git
